

A palette of high quality and robust materials has been selected to form a seamless floorscape that complements the high quality of buildings within Mayfair and Belgravia and that is responsive to the scale and nature of each estate's streets and spaces.

Careful consideration has been given to ensuring that the number of different materials used within Mount Street is kept to a manageable minimum. This will help to ensure that surfacing materials create an underlying sense of order and harmony. It will also help to ensure that they relate to, and enrich, the character of Mount Street, and will simplify long-term management and maintenance.

1 Pavements: Scoutmoor Yorkstone Flags  
900mm long x 600mm wide x 75mm thick

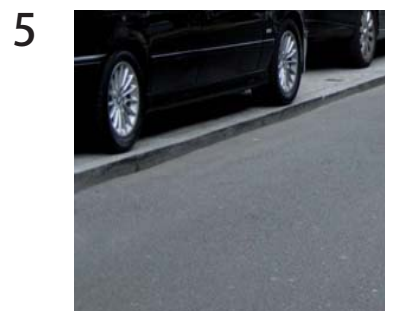

2 Car Park Bays: Granite Setts 250mm long x 150mm wide x 100mm thick.

3 Delivery Bays/ Loading Pads & Pedestrian Crossovers: Granite Setts 250mm long x 150mm wide x 100mm thick.  
Paved area comprised of a subtle mix of tones; light pink, oatmeal, light beige.

4 All kerbs: Granite 900mm long x 300mm wide x 200mm thick (100mm visible kerbface)  
Carriageway to be resurfaced with Hot Rolled Asphalt

5 Hot Rolled Asphalt

Mount Street will have a new suite of street furniture where appropriate including bespoke designed cycle stands (right) and cube seating.

The existing street lighting layout will be replaced with a new scheme that uses the traditional Mackenzie and Moncur column to provide safe levels of light.
